

PayForMe — Platform Integrations Guide

Version: 1.0

Includes: Company verification · SMS · MoMo · Cloud storage

Audience: Operations, compliance, and technology partners

This guide combines the integration documents in `/docs` . For the latest detail, prefer the individual markdown files linked in each section.

Part A — Company & business verification

Full document: [company-onboarding-requirements.md](#)

Required company details

Field	Description
Legal entity name	Full registered company name
Trading name	Customer-facing brand (e.g. PayForMe)
Certificate of Incorporation number	Registrar-issued
Business Registration number	Ghana RGD / equivalent
TIN	Tax Identification Number
VAT number	If applicable
Registered & operational address	Full postal addresses
Directors & beneficial owners	IDs and ownership declaration

Mandatory documents

1. **Certificate of Incorporation**
2. **Memorandum & Articles / Constitution**
3. **Business operating license** (if regulated sector)
4. **Proof of business address** (utility bill or lease, ≤ 3 months)
5. **TIN certificate**
6. **Register of directors + UBO declaration**
7. **Director / UBO Ghana Card or passport**
8. **Board resolution** authorizing signatory
9. **Corporate bank account confirmation letter**
10. **AML/KYC and privacy policies** (for payment & cloud partners)

Submit KYB before activating SMS Sender ID, MoMo merchant account, bank API, or production cloud bucket.

Part B — SMS (Arkesel)

Full document: [sms-integration.md](#)

Quick setup

```
SMS_PROVIDER=arkesel  
SMS_API_KEY=your_arkesel_api_key  
ARKESEL_SMS_SENDER_ID=PayForMe  
ARKESEL_SMS_API_VERSION=legacy  
SMS_API_URL=https://sms.arkesel.com/sms/api
```

Use cases

- Phone verification OTP
- Withdrawal OTP
- Security SMS notifications

Requirements

- Arkesel dashboard account + API key
 - **Approved Sender ID** (max 11 characters)
 - Company KYB documents (Part A)
-

Part C — MTN MoMo payments

Full document: [momo-integration.md](#)

Quick setup

```
PAYMENT_PROVIDER=momo  
MOMO_SUBSCRIPTION_KEY=  
MOMO_API_USER=  
MOMO_API_KEY=  
MOMO_API_URL=https://sandbox.momodeveloper.mtn.com  
MOMO_TARGET_ENVIRONMENT=sandbox  
MOMO_CURRENCY=EUR  
MOMO_CALLBACK_URL=https://yourdomain.com/api/webhooks/payments/momo
```

Use cases

- Wallet deposits (MoMo accounts)
- Subscription payments

Sandbox notes

- URL: `https://sandbox.momodeveloper.mtn.com`
- Currency: `EUR` in sandbox, `GHS` in production
- **No real USSD prompt** in sandbox — use MTN developer simulator
- Webhook must be publicly reachable (HTTPS)

Requirements

- MTN MoMo Developer portal account
 - Collections API subscription
 - Company KYB + merchant agreement
-

Part D — Cloud document storage

Full document: [cloud-storage-setup.md](#)

Quick setup (Cloudflare R2 example)

```
STORAGE_DRIVER=s3
S3_BUCKET=payforme
S3_REGION=auto
S3_ENDPOINT=https://<account-id>.r2.cloudflarestorage.com
S3_ACCESS_KEY_ID=
S3_SECRET_ACCESS_KEY=
S3_PUBLIC_URL=https://cdn.yourdomain.com
FILE_MAX_SIZE_MB=10
FILE_SIGNED_URL_TTL_SECONDS=900
```

Storage model

Content	Visibility	Access
KYC, financing, mandates	Private	Signed URL + audit log
Property & profile images	Public	CDN / public prefix

API

- `POST /api/files/access` — short-lived signed URL for private documents
- All access logged as `FILE_ACCESS` in audit trail

Requirements

- Cloud provider account (R2, AWS S3, or DigitalOcean Spaces)
 - Company KYB for vendor billing identity
 - Never commit secrets to git
-

Part E — Partner Bank API

Full document: [bank-partner-api.md](#) · [PDF](#)

Bank deposits, withdrawals, installment charges, and webhooks for licensed partner banks.

```
BANK_API_KEY=  
BANK_WEBHOOK_SECRET=
```

Document index

Document	Markdown	PDF command
Company onboarding	docs/company-onboarding-requirements.md	npm run docs:integrations-pdf
SMS (Arkesel)	docs/sms-integration.md	↑
MoMo	docs/momo-integration.md	↑
Cloud storage	docs/cloud-storage-setup.md	↑
Combined guide	docs/platform-integrations-guide.md	↑
Bank Partner API	docs/bank-partner-api.md	npm run docs:bank-partner-pdf

Regenerate PDFs

```
npm run docs:integrations-pdf
```

Outputs to `docs/*.pdf` alongside each markdown file.
